Imported Olive Oils

Traditional Extra Virgin Olive Oil

has the perfect balance of flavor obtained by mechanical cold press extraction. Bellissimo Extra Virgin Olive Oil is light in color, naturally low in acid, below 1%, and adds a savoury taste to foods without overwhelming their flavor. Extra Virgin Olive Oil is ideal to enhance the flavor of pastas, salads, sauces, and marinades.

Pure Olive Oil

is a combination of selected virgin olive oils refined with an addition of Extra Virgin Olive Oil. It is lighter in color with a milder flavor than Extra Virgin Olive Oil. Bellissimo Pure Olive Oil can be used as an all-purpose cooking oil and flavor enhancer. Bellissimo Pure Olive Oil is also ideal for use in salads.

Pomace Olive Oil

comes from extracting the oil from the olive after first press. Pomace oil is refined like Pure Olive Oil to lower the acidity level below 3%. This economical olive oil is useful in all areas of cooking, and has a smoke point of 410. Its rich flavor profile makes it ideal for use in salads and other cooking applications.
